College of Fine Arts

Department Of Animation

DEPARTMENT OF ANIMATION

Vision

To produce effectively trained socially responsible and creative media professionals to serve the society and industry. To make the students ready with the future technologies and tools, which are focuses on developing, content, which has positive impact on the social and economic aspects of the society and industry?

Mission

- To offer Animation and Multimedia courses that adds value to student competencies.
- To promote quality education, research, and consultancy for industrial and societal needs.
- To impart leadership and teamwork qualities in students
- To provide state-of-the-art resources that contributes to better learning environment.
- To encourage students to pursue higher education and take competitive exams and various career enhancing courses.
- To establish centres of excellence in emerging areas of research
- To have regular interaction with industry and offer solutions to their problems

Program Educational Objectives (PEOs)

PEO 1: Practice animation in a broad range of industrial, societal, and real-world applications

PEO2: Pursue advanced education, research and development, and other creative and innovative efforts in science, engineering, and technology, as well as other professional careers

PEO 3: Conduct themselves in a responsible, professional, and ethical manner

PEO 4: Take part as leaders in their fields of expertise and in activities that support service and economic development throughout the world

Programme Outcomes (PO's)

1. **Artistic and technical knowledge:** An ability to apply the artistic knowledge in using the traditional and technical tools of animation in the field of animation
2. **Problem analysis:** An ability to identify, formulate, review, and analyse and solve complex problems in the animation production pipeline
3. **Design solutions:** An ability to design animations in variety of mediums which
4. **Analysis, Design and Research:** An ability to design and conduct experiments, as well as to analyse and interpret data
5. **Modern tool usage:** An ability to use the techniques& skills in animation
6. **The society and culture:** Contextual knowledge to assess societal, health, safety, legal and cultural issues, and the consequent responsibilities relevant to Animation

- 7. Environment and sustainability:** Explore media, communication, and dissemination techniques to entertain via written, oral, and visual media.
- 8. Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the professional practice.
- 9. Individual and teamwork:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- 10. Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- 11. Project management and finance:** Demonstrate knowledge and understanding of the Animation principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- 12. Life-long learning:** Recognize the need for and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Correlation between the POs and the PEOs

Program Specific Outcomes (PSOs):

PSO1: Ability to understand different animation principles

PSO2: Ability to use different animation tools to work on a real time animation film project

PSO3: Ability to apply project management principles, Legal and contractual aspects to real time projects for efficient execution animation projects

PSO4: Ability to use tools and techniques to create aesthetically pleasing animation and multimedia content

The various modules or core areas recommended for the 3-week SIP are:

SIP Module I: Universal Human Values I (UHV I)

22

hours

The purpose is to help develop a holistic perspective about life. A self-reflective methodology of teaching is adopted. It opens the space for the student to explore his/her role (value) in all aspects of living – as an individual, as a member of a family, as a part of the society and as a unit in nature. Through this process of self-exploration, students can discover the values intrinsic in them. The session wise topics are given below:

| Session No | Topic Title | Aspirations and Issues | Basic Realities (underlying harmony) |
|--|-----------------------------|--|---|
| 1 | Welcome and Introductions | Getting to know each other | Self-exploration |
| 2 and 3 | Aspirations and Concerns | Individual academic, career... Expectations of family, peers, society, nation... Fixing one's goals | Basic human aspirations Need for a holistic perspective Role of UHV |
| 4 and 5 | Self-Management | Self-confidence, peer pressure, time management, anger, stress... Personality development, self-improvement... | Harmony in the human being |
| 6 and 7 | Health | Health issues, healthy diet, healthy lifestyle Hostel life | Harmony of the Self and Body Mental and physical health |
| 8, 9, 10 and 11 | Relationships | Home sickness, gratitude towards parents, teachers and others Ragging and interaction Competition and cooperation Peer pressure | Harmony in relationship Feelings of trust, respect... gratitude, glory, love |
| 12 | Society | Participation in society | Harmony in the society |
| 13 | Natural Environment | Participation in nature | Harmony in nature/existence |
| 14 | Sum Up | Review role of education Need for a holistic perspective | Information about UHVII course, mentor and buddy |
| 15 | Self-evaluation and Closure | Sharing and feedback | |
| SIP Module II: Physical Health and Related Activities | | | |
| This module is intended to help understand the basic principles to remain healthy and fit and practice | | | |

| |
|--|
| them through a healthy routine which includes exercise, games etc. |
| SIP Module 3: Familiarization of Department/ Branch and Innovation |
| This module is for introducing and relating the student to the institution/department/branch; how it plays a role in the development of the society, the state, region, nation, and the world at large and how students can participate in it. |
| SIP Module 4: Visit to a Local Area |
| To relate to the social environment of the educational institution as well as the area in which it is situated through interaction with the people, place, history, politics... |
| SIP Module 5: Lectures by Eminent People |
| Listening to the life and times of eminent people from various fields like academics, industry etc. about careers, art, self-management and so on enriches the student's perspective and provides a holistic learning experience. |
| SIP Module 6: Proficiency Modules |
| This module is to help fill the gaps in basic competency required for further inputs to be absorbed. It includes effort to make student proficient in interpersonal communication and expression as well as awareness about linguistic and thereafter NLP. |
| SIP Module 7: Literature / Literary Activities |
| Through the exposure of local, national, and international literature, this module is aimed at helping the student learn about traditional as well as contemporary values and thought. |
| SIP Module 8: Creative Practices |
| This module is to help develop the clarity of humanistic culture and its creative, joyful expression through practice of art forms like dance, drama, music, painting, pottery, sculpture etc. |
| SIP Module 9: Extra-Curricular Activities |
| This is a category under which things that are not placed in any of the above may be placed. Some clubs and hobby group may be made for each of the above categories, so that students may pursue them even after SIP. |
| The recommended hours to be allocated are given above. Depending on the available faculty, staff, infrastructure, playgrounds, class timings, hostellers, and day scholars etc., the timetable for these activities may be drawn up. Of course, colleges may conduct an inaugural function at the beginning of the SIP; and they may also conduct a celebratory closing ceremony at the end of the SIP. During the lockdown phase, appropriate care may be taken and some or all activities may be planned in distance-learning or on-line mode. |
| Implementation: |

The institution is expected to conduct the 3-week SIP under the guidance of the Director/Principal or Dean Students or a senior faculty member. For this, the institution is expected to make an SIP Cell. The SIP Cell will be responsible for planning, and then implementation of the SIP.

Follow up:

An important part of the SIP is to associate one faculty mentor to every small group of about 20 students; and associate one senior student buddy to an even smaller groups of about 5 students for the guidance required for holistic development of the newly joined student throughout his/her time in the institution/college.

These activities are to be continued in the ongoing academic program along with other cultural activities through the Student Activity Cell (SAC).

The SIP is only the beginning of the interaction with newly joined students.

MODULE - I

Environmental studies–Introduction: - Definition, scope, and importance, Measuring and defining environmental development indicators.

Environmental and Natural Resources: Renewable and non-renewable resources - Natural resources and associated problems - Forest resources - Use and over - exploitation, deforestation, case studies - Timber extraction, dams- benefits and problems.

MODULE - II

Basic Principles of Ecosystems Functioning: Concept of an ecosystem. -Structure and function of an ecosystem. - Producers, consumers, and decomposers. - Energy flow in the ecosystem Ecological succession. - Food chains, food webs and ecological pyramids. Introduction, types, characteristic features, structure, and function of the following ecosystem:

- Forest Ecosystem
- Grassland Ecosystem
- Desert Ecosystem

d) Aquatic Ecosystem (Ponds, Streams, Lakes, Rivers, Oceans, Estuaries)

MODULE - III

Biodiversity and its conservation: Introduction – Definition- genetic, species and ecosystem diversity.

Bio-geographical classification of India

Threats to biodiversity: habitat loss, poaching of wildlife, man-wildlife conflicts. - Endangered and endemic species of India.

Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity

MODULE - IV

Environmental Pollution: Definition, Cause, effects, and control measures of

- a) Air pollution
- b) Water pollution
- c) Soil pollution
- d) Marine pollution
- e) Noise pollution
- f) Thermal pollution
- g) Nuclear hazards

MODULE - V

Social Issues and the Environment: From unsustainable to sustainable development -Urban problems related to energy -Water conservation, rainwater harvesting, and watershed management - Climate change, global warming, acid rain, ozone layer depletion, nuclear accidents, and holocaust. Case Studies. – Waste land reclamation

MODULE - VI

Human Population and the Environment: Population growth, variation among nations. Population explosion Role of information Technology in Environment and human health. - Case Studies.

Field work: Visit to a local area to document environmental assets River /forest grassland/hill/mountain - Visit to a local polluted site-Urban/Rural/industrial/ Agricultural Study of common plants, insects, birds. - Study of simple ecosystems- pond, river, hill slopes, etc.

- **2D Artistic Integrity:** Using photographs for source information in the service of their own vision is permitted only in rare situations. Occasionally, the use of one's own photographs is unavoidable if drawing a subject from direct observation is too dangerous or difficult.
- **2D Homework** as in any college-level course, it is expected that students will spend a considerable amount of time outside the classroom working on completion of assignments. Ideas for projects or solutions to problems should be worked out in a sketchbook both in & out of class Group
- **2D Open Studio:** students may come into the art room to work on assignments during their study landscape, painting, class works (with the teacher's approval).
- **Sketchbook: 20%** -story board, script works, principles of animation work Must show evidence of decision making and documentation of informed and critical decision making, written critiques and reactions to art created by self, established artists and peers, and documentation of a coherent plan of investigation for concentration.
- **Class Participation: 40%** - Must demonstrate daily effort and time on task in & out of class, active engagement in discussion and critiques, and completion of artist article reflections.
- **Portfolio: 40%** - Includes class projects and outside assignments demonstrating successful engagement with concepts of Breadth, Quality, and Concentration. Project grades are based on the project rubric. Students do a self-evaluation using the rubric and submit it with their project.
- **Portfolio Exhibition** At the conclusion of the College works.
- **Work in a sketchbook.** Draw/write/paint/collage in it. Fill one-fourth of your sketchbook. 2. Complete "Object Series" Project. Incorporate a selected object into three completely different

compositions. The object must be drawn from direct observation. All three compositions must have relationship with each other. Pieces can be no smaller than 9"x 12" and no larger than 12"x 18". of three / four students

1. Submission of 30 to 60 seconds 2D animation Film of a chosen subject giving equal importance to all the elements in cell or key frame animation with sound.

| CO4 | To understand unwrapping and texturing props for animation | 7,8 | 5,6 |

MODULE - I

Introduction to 3D Software, Introduction to the 3D software, Interface of 3D software, navigation tools, shading methods, what is prop, needs and mean safety shop space

MODULE - II

Creating NURBS Models, NURBS Curves, Revolving, lofting, and extruding curves to create surfaces, attaching, and detaching surfaces, socking, stitching surfaces. Modelling using polygons, creating polygon primitive objects, polygon components, editing polygon surfaces, combining, and separating polygons. Polygon Prop modelling, creating polygon prop models, Understanding topology

MODULE - III

Unwrapping and Texturing Props, Unwrapping method, Automatic Mapping, Planar Mapping, Cylindrical mapping, Spherical mapping,

MODULE - IV

Creating surface camera-based mapping, Texturing props using images. Texturing deformable characters. Procedural texturing.

Advanced communication skills (including laboratory)

The student must learn **Soft skills and Advanced communication skills (including laboratory)** which can be dealt by course instructor allotted by the department head.

Suggested Input Learnings:

➤ Soft skills:

- JAM
- Oral Presentation
- Group Discussion
- Debate
- Role Play

➤ Advanced Communication Skills Laboratory:

- Listening Skills
- Note Taking/Note making
- Resume/CVV writing
- PPT slides
- Interview Skills- Mock Interview/ Public speaking

Note:

Marks can be awarded based on internal assessment such as submissions, performance, viva voce etc.

Total marks:100

- 50M - Day to day performance, Record, Viva, Attendance &
- 50M – {soft skills- 25M (Write up - 10M, Performance - 15M), AELCS- 25M (Write up – 10M, Performance – 15M)}

MODULE - I

Introduction to traditional knowledge: Define traditional knowledge, nature and characteristics, scope and importance, kinds of traditional knowledge, Indigenous Knowledge (IK), characteristics, traditional knowledge vis-a-vis indigenous knowledge, traditional knowledge Vs western knowledge traditional knowledge.

MODULE - II

Legal framework and TK: The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006, Plant Varieties Protection and Farmer's Rights Act, 2001 (PPVFR Act); The Biological Diversity Act 2002 and Rules 2004, the protection of traditional knowledge bill, 2016.

MODULE - III

Protection of traditional knowledge: The need for protecting traditional knowledge Significance of TK Protection, value of TK in global economy, Role of Government to harness TK.

MODULE - IV

Traditional knowledge and intellectual property: Systems of traditional knowledge protection, Legal concepts for the protection of traditional knowledge, Patents and traditional knowledge, Strategies to increase protection of traditional knowledge.

MODULE - V

Traditional Knowledge in Different Sectors: Traditional knowledge and engineering, Traditional medicine system, TK in agriculture, Traditional societies depend on it for their food and healthcare needs, Importance of conservation and sustainable development of environment, Management of biodiversity, Food security of the country and protection of TK

MODULE - VI

Education System in India: Education in ancient, medieval, and modern India, aims of education, subjects, languages, Science and Scientists of Ancient India, Science and Scientists of Medieval India, Scientists of Modern India.
